

# CHART Angler Socio-Economic Survey

You have been on a fishing trip that is part of the pilot Catch And Release Tag (CHART) scientific data collection programme for Atlantic Bluefin Tuna (ABT).

**Your feedback on the programme is vital to understand the benefits generated from sea angling for bluefin tuna and support development of future bluefin tuna policy.**

We are interested to find out about how much you have spent on your visit, your reasons for wanting to fish for bluefin tuna, and your angling experience. This will help decision makers to understand the impact of CHART on national and local economies, and the broader social benefits of angling for bluefin tuna.

Your responses will be anonymised and available only to researchers with both scientific and ethical approvals. A summary and full report will be made available publicly, but no personal information which could be used to identify you will be published or shared. You can choose to stop the survey at any time and withdraw any data that you have submitted.

The more people willing to take part, the better the quality of the information produced. The data collected will be used to produce a report used by officials and policy makers to inform future CHART programmes.

**We appreciate your help in completing this survey which will take 5-10 minutes. If you complete the survey, you can enter a prize draw with the chance to win a CHART soft-shell jacket and three runner-up prizes of a CHART t-shirt.**

You can access the survey by scanning the QR code below or at the following link: [https://defragroup.eu.qualtrics.com/jfe/form/SV\\_4SdDYdBG7SwuTWu](https://defragroup.eu.qualtrics.com/jfe/form/SV_4SdDYdBG7SwuTWu).

[CHART](#) is run by Centre for Environment, Fisheries and Aquaculture Science ([www.cefas.co.uk](http://www.cefas.co.uk)) and funded by the Department for Environment, Food & Rural Affairs ([Defra](#)).
